MICROFIBER PERFORMANCE WEAR

stay Cooler when it's Hot...Warmer when it's Cool
Our new microfiber shirts are so comfortable that you'll hardly notice your wearing it. With a generous cut and multi-directional stretch, it's the perfect choice for most every activity. Superior breathability helps regulate body temperature as perspiration is transported away from the body to the garment surface for quick evaporation.

Experience the difference!

Silver Eagle's three-layer fabric design offers easy, effective, ultra-lightweight cooling relief without substantial weight or bulk. No chemicals, gels, ice packs, or refrigeration are required to activate the cooling process. Instead, Silver Eagle garments are submerged in water for a few minutes, and the special construction of the fabric absorbs and retains the optimal amount of water without swelling or over saturation.
