

Xena

www.xenasecurity.com

It would take someone truly diabolical, like Magneto, to get past the defenses of the new Xena locks. Voted best in breed among lock, alarm and accessory manufacturers in Indianapolis, Xena locks don't mess around. Their XGA ground anchor locks feature a concentric circle design that affixes to your garage floor in minutes with a single bolt (included). This lock can withstand up to 8 tons of force. Many of their other locks would deafen anyone even looking at your bike the wrong way. Xena has been certified in Holland, France, the UK, Poland and Finland. Only an international super-villain could ignore the 110dB siren and deter the shock sensor long enough to tear the lock out of concrete.
